

Introducing the World's first survey-grade UAS laser scanner

Typical applications include

Power Line, Railway Track, and Pipeline Inspection
Terrain and Canyon Mapping
Surveying of Urban Environments
Capturing the Topography in Open-Cast Mining Areas
Archaeology and Cultural Heritage Documentation
Construction-Site Monitoring
Corridor Mapping
Agriculture and Forestry
Flood Zone Mapping

RIEGL VUX®-1 Preliminary Technical Data

max. operating flight altitude AGL

pulse repetition rate PRR (peak)

eye safe operation at Laser Class 1

online waveform processing

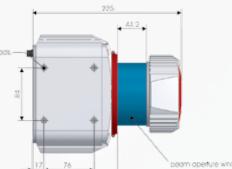

multiple target capability

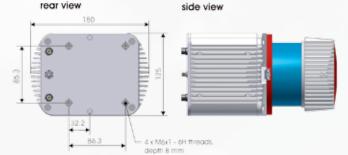

Eye Safety Class	Laser Class 1
Max. Range @ Target Reflectivity 60%	920 m
Max. Range @ Target Reflectivity 20%	550 m
Minimum Range	5 m
Accuracy/Precision	25 mm
Max. Effective Measurement Rate	up to 500,000 meas./sec
Field of View (FOV)	up to 300°
Max. Operating Flight Altitude AGL	350 m / 1,150 ft

Class 1 Laser Product according to IEC60825-1:2007 bottom view

Mechanical Drawings

RIEGL VUX®-1 with external IMU-Sensor (optional)

Multiple-Time-Around data acquisition and processing

compact and lightweight

Highlights

- compact, rugged and very lightweight design
- easily mountable to professional UAS/UAV/RPAS
- high-accuracy ranging based on echo digitization and online waveform processing
- high laser pulse repetition rate up to 600 kHz for fast data acquisition
- fast scan speed up to 200 scans/sec.
- field of view up to 300° enabling data acquisition in narrow, complex environments

- multiple target capability unlimited number of target echoes
- perfectly parallel scan lines
- regular point pattern
- electrical interfaces for GPS data string and Sync Pulse (1PPS)
- mechanical interface for IMU mounting
- scan data storage on internal 240 GByte SSD Memory
- integrated LAN-TCP/IP interface
